1:50 Cat® PL87 Pipelayer

The Cat® PL87 Pipelayer is designed specifically for oil and gas pipeline projects, known for its stability and operational efficiency. It has a strong lifting capacity of about 97,976 kg, powered by the Cat® C15 engine, which provides high torque and reliable performance under heavy loads. The power system includes differential steering for excellent control in tight or steep areas.

Additionally, The PL87 offers precise electro-hydraulic controls, enhancing safety and efficiency in lifting. It features improved stability with extended track support and a balanced design that functions well on uneven slopes. The Product Link system allows for real-time remote monitoring, and centralized maintenance points make servicing easier, reducing downtime. These features collectively boost efficiency and safety on the job site.
